APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions.

This temporary permit to change the place of use of a portion of the waters of an underground source as heretofore granted under Permit 24013, Certificate 8286, is issued subject to the terms and conditions imposed in said Permit 24013, Certificate 8286, and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Temporary Permits 68455-T, 68456-T, Permit 24013, Certificate 8286, and Permit 30521, Certificate 10423, and any water of the Walker River Decree and any storage water appurtenant to the place of use shall not exceed 1543.72 acre-feet per year for the irrigation of 385.93 acres. Furthermore, the total combined duty of water under Temporary Permits 68455-T and 68456-T and any water of the Walker River Decree and any storage water appurtenant to the place of use shall not exceed 560 acre-feet per year for the irrigation of 140 acres. The permit holder is responsible for insuring delivery of the entitled decreed and storage waters that are supplemental to these permits. In any year the Walker River Irrigation District declares a full allocation of decreed water to the priority years of C-125 decree claims supplemental to these permits, underground water shall not be pumped from the wells described in these permits. In any year the Walker River Irrigation District has no decreed or storage water, or declares a reduced allocation of surface waters to the priority years of C-125 decree claims supplemental to these permits, then water can be pumped from wells for irrigation of the permitted places of use. Irrigation shall not exceed a duty of four acre-feet per year from the total of decreed, storage, and underground waters.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **April 11, 2003** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.73 cubic feet per second, but not to exceed 560.0 acre-feet annually, and not to exceed an annual duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.

Work must be prosecuted with reasonable diligence and be completed on or before:

Proof of completion of work shall be filed before:

Water must be placed to beneficial use on or before:

Proof of the application of water to beneficial use shall be filed on or before:

Map in support of proof of beneficial use shall be filed on or before:

IN TESTIMONY WHEREOF, I, HUGH RICCI, P.E.,

State Engineer of Nevada, have hereunto set

Item 15. Remarks

The water under this application is for irrigation of 140.0 acres. Desert Pearl Farms is leasing the land within the place of use from the Circle Bar N Ranch for approximately 2 years.

The water under base right Permit 24013 is partially supplemental to water rights under Permit 30521. The supplemental acreage within the existing place of use will be proportionately reduced during the period that the lease is in effect, as shown in sketch on file at the Division of Water Resources under Permit 67046-T.

Use proof of beneficial use map on file at the Division of Water Resources under Permit 24013 to support the existing place of use and the proposed and existing point of diversion, and the attached sketch to support the proposed place of use.
